

Claycots School

COVID Risk Assessment – 4th January 2022

Claycots School takes its responsibilities to students, staff, visitors and the local community, extremely seriously. The wellbeing and health & safety of our community has been central to our planning. This Risk Assessment explains the actions our school leaders should take to reduce the risk of transmission of coronavirus (COVID-19) in our school. The Risk Assessment includes public health advice, endorsed by Public Health England (PHE). In accordance with the DFE Schools COVID-19 operational guidance, the Risk Assessment outlines the measures to be in place in our School from 1st November 2021, unless an outbreak should occur (see Claycots Outbreak Management Plan).

This risk assessment has been updated following recent advice from Slough Borough Council.

As the country has now moved to Step 4 of the roadmap, the government will continue to manage the risk of serious illness from the spread of the virus. This marks a new phase in the government's response to the pandemic, moving away from stringent restrictions on everyone's day-to-day lives, towards advising people on how to protect themselves and others, alongside targeted interventions to reduce risk. As COVID-19 becomes a virus that we learn to live with, there is now an imperative to reduce the disruption to children and young people's education - particularly given that the direct clinical risks to children are extremely low, and every adult has been offered a first vaccine and the opportunity for two doses by mid-September. Our priority is to deliver face-to-face, high quality education to all pupils. The evidence is clear that being out of education causes significant harm to educational attainment, life chances and mental and physical health. The school is aware of the legal responsibilities of providers in taking steps to reopen. The school has duties of care towards staff, students and visitors, including under the Health and Safety at Work Act 1974 and the Equality Act 2010. The school will continue to comply with those obligations

**Claycots School COVID Risk Assessment –
4th January 2022**

Arrangements	Plans in school
Mixing and Bubbles	<p>There will be additional ventilation on the dining halls during lunchtimes. Whole school assemblies will continue to be held remotely. All in-school events will be fully risk assessed, taking into account current government guidance.</p> <p>The Outbreak Management Plan covers the possibility that it may become necessary to reintroduce 'bubbles' for a temporary period, to reduce mixing between groups. Any decision to recommend the reintroduction of 'bubbles' would take account of the detrimental impact they can have on the delivery of education.</p> <p>The one-way systems in place both within school buildings and around the school site have been removed. Staggered start and finish times no longer apply.</p>
Tracing close contacts and isolation	<p>Close contacts will be identified via NHS Test and Trace and education settings will no longer be expected to undertake contact tracing. Any child/adult who is a close contact of a confirmed case should take a daily LFD test for 7 days after contact.</p> <p>Government and PHE guidelines will be followed regarding isolation - these have recently been updated as follows: If isolating after a positive PCR, people who receive negative LFD results on day 6 and day 7 of their self-isolation period – with tests taken 24 hours apart – will no longer have to self-isolate for the full 10 days. The first test must be taken no earlier than day 6 of the self-isolation period.</p>

Face coverings	<p>Face coverings/masks must be worn by all staff and visitors in communal areas . Staff can wear a face covering at all times if they wish - non-vaccinated staff are advised to wear masks at all times and take extra precautions regarding social distancing. Parents/carers will be advised to wear masks when collecting/ dropping their children and when attending in-school events. Disposable masks are available at main reception at both campuses.</p> <p>There are a limited number of cloth masks with clear vision panels for staff who request them.</p>
Stepping measures up and down	<p>The Outbreak Management Plan outlines how we would operate if there was an outbreak in a school or in the locality.</p>
Ensure good hygiene for everyone	
Hand Hygiene	<p>We will continue to promote frequent and thorough hand cleaning, using soap and water or hand sanitizer.</p> <p>We will continue to provide wipes at frequently used touch points e.g. photocopiers, microwaves</p>
Respiratory Hygiene	<p>We will continue to promote the 'catch it, bin it, kill it' approach.</p>
Use of personal protective equipment (PPE)	<p>Wearing of masks/face coverings will be reintroduced in communal areas and corridors for all staff and visitors. Staff should continue to wear full PPE when dealing with vomit, changing nappies etc.</p>
Maintain appropriate cleaning regimes, using standard products such as detergents	
Maintain appropriate cleaning regimes, using standard products such as detergents	<p>An appropriate cleaning schedule will be in place to ensure regular cleaning of areas and equipment with a focus on frequently touched surfaces.</p>
Keep occupied spaces well ventilated	

<p>Keep occupied spaces well ventilated</p>	<p>When the school is in operation, it is important to ensure it is well ventilated and that a comfortable teaching environment is maintained.</p> <p>Opening external windows will be considered (weather and temperature dependent) alongside the opening of internal doors to assist with the throughput of air.</p>
<p>Follow public health advice on testing, self-isolation and managing confirmed cases of COVID-19</p>	
<p>When an individual develops COVID19 symptoms or has a positive test</p>	<p>Pupils, staff and other adults should follow public health advice on when to self-isolate and what to do. They should not come into school if they have symptoms, have had a positive test result or other reasons requiring them to stay at home due to the risk of them passing on COVID-19 (for example, they are required to quarantine).</p> <p>Anyone in school who develops COVID-19 symptoms should follow public health advice.</p> <p>If a pupil is awaiting collection, they should be left in a room on their own if possible and safe to do so. A window should be opened for fresh air ventilation if possible. Appropriate PPE should also be used if close contact is necessary. Any rooms they use should be cleaned after they have left.</p>
<p>Asymptomatic testing</p>	<p>Staff should undertake LFD test three times a week on Mon, Wed & Fri whenever they are on site until the end of the school term, when this will be reviewed. If staff have tested positive previously they should not take a LFD test for 90 days after their positive test, as the LFD may still give a positive result even though they have fully recovered.</p>
<p>Confirmatory PCR tests</p>	<p>Staff and pupils with a positive LFD test result should self-isolate in line with the stay at home guidance and take a free PCR test to check if they have COVID-19. Whilst awaiting the PCR result, the individual should continue to self-isolate.</p> <p>If the PCR test is taken within 2 days of the positive lateral flow test, and is negative, it overrides the self-test LFD test and the staff member or pupil can return to school, as long as the individual doesn't have COVID-19 symptoms.</p>

Other considerations	
Clinical Extremely Vulnerable Children	All CEV children and young people should attend their education setting unless they are one of the very small number of children and young people under paediatric or other specialist care who have been advised by their GP or clinician not to attend.
Admitting Children into school who show symptoms	<p>In most cases, parents and carers will agree that a pupil with symptoms should not attend the school, given the potential risk to others.</p> <p>If a parent or carer insists on a pupil attending your school the school can take the decision to refuse the pupil if, in our reasonable judgement, it is necessary to protect other pupils and staff from possible infection with COVID-19.</p>
Attendance	<p>School attendance is mandatory for all pupils of compulsory school age and it is our priority to ensure that as many children as possible regularly attend school.</p> <p>Where a child is required to self-isolate or quarantine because of COVID-19 in accordance with relevant legislation or guidance published by PHE or the DHSC they should be recorded as code X (not attending in circumstances related to coronavirus).</p> <p>Where they are unable to attend because they have a confirmed case of COVID-19 they should be recorded as code I (illness)</p>
Travel and quarantine	Parents travelling abroad should bear in mind the impact on their child's education which may result from any requirement to quarantine or isolate upon return.
Remote Education	<p>If a child is isolating because they have tested positive but are fit and well, then Schools should continue to deliver remote education.</p> <p>The remote education provided should be equivalent in length to the core teaching pupils would receive in school.</p>

Education Recovery	The school has a plan in place to ensure children catch up on their missed education during the pandemic.
Pupil Well-being and support	We are aware that some children will be experiencing a variety of emotions in response to their own experiences of COVID, such as anxiety, stress, low mood or bereavement and we have robust measures in place to allow them access to the support that they need.
School Workforce	Clinically extremely vulnerable (CEV) people are no longer advised to shield but may wish to take extra precautions to protect themselves, and to follow the practical steps set out in the CEV guidance to minimise their risk of exposure to the virus. The Outbreak Management Plan outlines how we would manage those staff members if an outbreak occurred.
Education Visits	<p>Full and thorough risk assessments in relation to all educational visits will be in place and any public health advice, such as hygiene and ventilation requirements, will be included as part of any risk assessments.</p> <p>The Outbreak Management Plan outlines how we would manage Educational Visits should an outbreak occur.</p>
